

RS-232 Line Surge Protection

NLightning - We anti-lightning!

OVERVIEW

RS-232 is a legacy serial communication interface which widely used in the field of industrial application. Though it has relatively low speed data rate, still suitable for most of control or monitoring purpose. Since industrial application requires higher stability, it should be robust to overcome interferences.

SOLUTION

- NLC10K06SMT
- NLSMC12
- NLC12CI

COMPLIANCE

- IEC61000-4-2
- IEC61000-4-5
- ITU-T K.21

BENEFIT

- Quick response
- Superior surge capability
- Relatively low residual voltage
