

VDSL Line Surge Protection

NLightning - We anti-lightning!

OVERVIEW

VDSL is a type of digital subscriber line technology, which provide higher data rate than ADSL. Same as ADSL, it uses former copper telephone line to provide internet access. VDSL2 was the improvement of VDSL, and able to transmit data even faster.

SOLUTION

- NLC4532-400
- NLC08CI

COMPLIANCE

- IEC61000-4-2
- IEC61000-4-5
- ITU-T K.21

BENEFIT

- Low capacitance to ensure data transmission
- Superior surge capability
- Low residual voltage
