

RS-485 Line Surge Protection

NLightning - We anti-lightning !

OVERVIEW

RS-485 is a legacy interface which transmit data by balanced differential signal line. Because of its long distance transmission capability and robust interface, it's suitable for automation or industrial control system. In some modern design, it may share the same signal paths with RS-232.

SOLUTION

- NLC0300CP
- NLSMC12
- NLC12CI

COMPLIANCE

- IEC61000-4-2
- IEC61000-4-5
- ITU-T K.21

BENEFIT

- Quick response
- Superior surge capability
- Relatively low residual voltage
