

# Cable STB Surge Protection

NLightning - We anti-lightning !

## OVERVIEW

STB is an information appliance device that turning the source signal into content. Its source could be satellite, terrestrial signal which input by coaxial cable. Due to the trend of transferring analog signal to digital signal to provide more content, it would be the most important content access equipment.

### SOLUTION

- NLC4532-090
- NLC05CI

### COMPLIANCE

- IEC61000-4-5
- ITU-T K.21

### BENEFIT

- Low capacitance that ensure data transmission
- Superior surge capability
- Low residual voltage
