

APPLICATION SPECIFIC INDUCTOR

General Description

NLCM0805-H01 is a specific designed Common Mode Choke for discrete LAN transformer, which work with NLDM3216 or NLPT4532 inductor to construct a discrete LAN solution.

Features

- 10/100/1G/2.5G Ethernet application
- High Common Mode Impedance
- Surface Mount Device
- Lead Free & Halogen Free

DEVICE CHARACTERISTICS

<i>Electrical Characteristics</i>			
Parameter	Symbol	Value	Unit
Common Mode Impedance (100MHz)	Z_C	800	Ω
Rated Voltage	V_R	125	V
Maximum Operation DC Current	I_{DC}	100	mA
DC Resistance	R_{DC}	1	Ω
Operation Temperature	T_J	-40 ~ 85	$^{\circ}\text{C}$
Storage Temperature	T_S	-40 ~ 85	$^{\circ}\text{C}$

GENERAL INFORMATION

<i>Material & Finish</i>	
Position	Material
Upper Plate	Ferrite
Contact	Copper Alloy
Contact Plating	Tin
Wire	Copper Wire
Core	Ferrite Core
